Thin Solid Films, 193/194 (1990) xiii–xviii

Contents

Preface v

In memorium vii

Publication schedule ix

Award winning papers xi

Basic properties of thin films

Quasi-crystalline structure formation in thin films 1
P. B. Barna, A. Csanády, G. Radnóczi (Budapest, Hungary), K. Urban and U. Timmer (Jülich, F.R.G.)

Fundamental studies of thin film growth

Monte Carlo simulations of ion-assisted selective deposition 13
C. Nender, S. Berg (Uppsala, Sweden) and J. P. Biersack (Berlin, F.R.G.)

Cathode voltage–gas composition–film crystallography relationships for sputter-deposited vanadia (V_2O_5) 18
C. R. Aita, L.-J. Liou, C.-K. Kwok, R. C. Lee and E. Kolawa (Milwaukee, WI, U.S.A.)

Sputtered alloy coatings by codeposition: effects of bias voltage 27
K. J. A. Mawella and J. A. Sheward (Kent, U.K.)

Molecular dynamics simulations of thin film diamond 34
B. Pailthorpe and P. Mahon (Sydney, New South Wales, Australia)

Crystallite growth kinetics in isothermally annealed sol–gel films 42
G. J. Exarhos (Richland, WA, U.S.A.) and M. Aloi (Boca Raton, FL, U.S.A.)

Deposition technology

Maximizing step coverage during blanket tungsten low pressure chemical vapor deposition 51
T. S. Cale, M. K. Jain and G. B. Raupp (Tempe, AZ, U.S.A.)

Reactive sputtering of molybdenum 61
A. F. Jankowski and L. R. Schrawyer (Livermore, CA, U.S.A.)

Thin films of amorphous germanium–carbon and germanium–nitrogen alloys prepared by activated reactive evaporation 72
S. Kumar and H. J. Trodahl (Wellington, New Zealand)

Deposition and etching technology

Ion-beam-deposited films produced by filtered arc evaporation 77
P. J. Martin, R. P. Netterfield and T. J. Kinder (Sydney, New South Wales, Australia)

Time-dependent simulation modelling of reactive sputtering 84
E. Kusano and D. M. Goulart (Tsukuba, Japan)

Formation of gold clusters in the ionized cluster beam deposition technique . 92
F. K. Urban III and A. Bernstein (Coral Gables, FL, U.S.A.)

Highly selective SiO_2/Si reactive ion beam etching with low energy fluorocarbon ions 100
E. Collard, C. Lejeune, J. P. Grandchamp, J. P. Gilles and P. Scheiblin (Orsay, France)

A.c. effects in asymmetric discontinuous metal films 110
J. E. Morris (Binghamton, NY, U.S.A.)

Sputtering effects related to thin film growth

Effects of an unbalanced magnetron in a unique dual-cathode, high rate reactive sputtering system 117
S. L. Rohde (Evanston, IL, U.S.A.), I. Petrov (Urbana, IL, U.S.A.), W. D. Sproul, S. A. Barnett, P. J. Rudnik and M. E. Graham (Evanston, IL, U.S.A.)

Substrate effects from an unbalanced magnetron 127
R. P. Howson, H. A. J'afer and A. G. Spencer (Loughborough, U.K.)

Hollow cathode deposition of silicon dioxide films 138
M. Gross, S. O. Kong, C. M. Horwitz and C. Y. Kwok (Kensington, New South Wales, Australia)

Measurement of sputtered atom energy by observation of Doppler broadening of emission lines from plasma 146
K. Kobayashi and Y. Uehara (Atsugi, Japan)

Energy fluxes in mixed microwave–r.f. plasma 155
O. M. Küttel, J. E. Klemberg-Sapieha, L. Martinu and M. R. Wertheimer (Montreal, Que., Canada)

Role of kinetic energy of sputtered particles in thin film formation 164
Y. Taga and Y. Gotoh (Aichi-ken, Japan)

An investigation into the variation in bombardment intensity from ion plating discharges by sputter weight loss experiments 171
K. S. Fancey and A. Matthews (Hull, U.K.)

Argon incorporation effects on the conductivity of metal layers 181
V. Stambouli, O. Burat, D. Bouchier, F. Meyer, J.-P. Gilles and G. Gautherin (Orsay, France)

Diffusion and interdiffusion effects

Interfacial reactions in Ag/SnTe thin film couples 189
V. Marinkovic, A. Prodan (Ljubljana, Yugoslavia) and C. L. Bauer (Pittsburgh, PA, U.S.A.)

On the microstructure–property relationship of W–Ti–(N) diffusion barriers. 201
A. G. Dirks, R. A. M. Wolters and A. J. M. Nellissen (Eindhoven, The Netherlands)

Epitaxy and heterostructure films

Defect passivation by hydrogen in III–V semiconductor epitaxial films 211
A. Frova and M. Capizzi (Rome, Italy)

Growth and microstructural properties of cadmium telluride thin films 220
T. C. Kuo, P. Ghosh, P. Kornreich (Syracuse, NY, U.S.A.) and J. Beasock (Rome, NY, U.S.A.)

A contact potential difference study of the epitaxial growth of aluminum on Pd(111) films 227
A. Domenicucci and R. W. Vook (Syracuse, NY, U.S.A.)

VLSI–ULSI metalization

Step coverage of tungsten silicide films deposited by low pressure dichlorosilane reduction of tungsten hexafluoride 234
G. B. Raupp, T. S. Cale and M. K. Jain (Tempe, AZ, U.S.A.), B. Rogers (Mesa, AZ, U.S.A.) and D. Srinivas (Phoenix, AZ, U.S.A.)

Lattice diffusion of boron in bulk cobalt disilicide 244
C. Zaring, P. Gas, B. G. Svensson, M. Östling and H. J. Whitlow (Kista-Stockholm, Sweden)

Influence of arsenic ion beam mixing on palladium silicide formation 248
N. Bibić, M. Milosavjević, D. Peruško (Belgrade, Yugoslavia) and Y. Serruys (Gif sur Yvette, France)

Surface and thin films analysis technique

Significance of sample rotation in Auger electron spectroscopy sputter depth profiling of thin films 258
A. Zalar (Ljubljana, Yugoslavia)

Investigation of the correlation between surface properties and surface chemistry of electroless nickel coatings 270
R. L. Moor and L. Salvati, Jr., (Edison, NJ, U.S.A.)

Hydrogen in metallo-organic chemically vapor-deposited ZnS thin films determined by nuclear resonance reaction analysis 280
P. B. Smith, B. E. Gnade (Dallas, TX, U.S.A.) and D. K. Marble (Denton, TX, U.S.A.)

Structural study of thin films by extended energy loss fine structure spectroscopy 289
M. de Crescenzi, N. Motta (Rome, Italy), L. Lozzi, M. Passacantando, P. Picozzi and S. Santucci (L'Aquila, Italy)

Quantitative analysis of titanium nitride by Auger electron spectroscopy . . . 305
D. G. Watson and W. F. Stickle (Eden Prairie, MN, U.S.A.) and A. C. Diebold (Austin, TX, U.S.A.)

Study of temperature-dependent ultrathin oxide growth on Si(111) using variable-angle spectroscopic ellipsometry 312
B. N. De and J. A. Woollam (Lincoln, NE, U.S.A.)

Extended fine-Auger-structure investigation of discontinuous chromium films 318
M. de Crescenzi (Rome, Italy), L. Lozzi, M. Passacantando, P. Picozzi and S. Santucci (L'Aquila, Italy)

Incorporation of —OH radicals in anodic silicon oxide films studied by secondary-ion mass spectroscopy, X-ray photoelectron spectroscopy and IR analysis 325
I. Montero, L. Galán, E. de la Cal, J. M. Albella (Madrid, Spain) and J. C. Pivin (Orsay, France)

Influence of elastic and plastic strain on the stress state of thin film composites 333
H. Behnken and V. Hauk (Aachen, F.R.G.)

Non-destructive characterization techniques

Defects in coatings 342
P. D. Townsend (Brighton, U.K.)

Real-time spectroscopic ellipsometry study of the electrochemical deposition of polypyrrole thin films 350
Y.-T. Kim, D. L. Allara, R. W. Collins and K. Vedam (University Park, PA, U.S.A.)

Real-time spectroscopic ellipsometry for determination of the optical functions of ion-beam-deposited hydrogenated amorphous carbon 361
Y. Cong, I. An, R. W. Collins, K. Vedam, H. S. Witham, L. J. Pilione and R. Messier (University Park, PA, U.S.A.)

A surface IR study of inorganic film formation GaAs, silicon and germanium by aqueous NH_4F, and HF 371
V. A. Burrows and J. Yota (Tempe, AZ, U.S.A.)

CdTe and CdMTe (M = Fe, In, Sb) thin film studies by Mössbauer spectroscopy and other techniques 382
F. Sánchez-Sinencio, J. G. Mendoza-Alvarez, O. Zelaya, A. Herrera, F. Larios, O. A. Fregoso, J. M. Figueroa and G. Contreras-Puente, A. D. Góngora (Mexico, Mexico), E. Galvao da Silva (Belo Horizonte, Brazil), R. B. Scorzelli (Rio de Janeiro, Brazil), M. H. Farías, L. Cota-Araiza and G. Soto (Mexico, Mexico)

X-ray standing waves in Bragg diffraction and in total reflection regions using Langmuir–Blodgett multilayers 395
S. I. Zheludeva (Moscow, U.S.S.R.), S. Lagomarsino (Rome, Italy), N. N. Novikova, M. V. Kovalchuk (Moscow, U.S.S.R.) and F. Scarinci (Rome, Italy)

Structural analysis of TiN films by Seemann-Bohlin X-ray diffraction 401
V. Valvoda, R. Kužel, Jr., R. Černý, D. Rafaja, J. Musil, S. Kadlec (Prague, Czechoslovakia) and A. J. Perry (Troy, MI, U.S.A.)

Comparison of tungsten and nickel oxide electrochromism in single films and in all-solid-state devices 409
C. R. Ottermann, A. Temmink and K. Bange (Mainz, F.R.G.)

Microstructure and mechanical properties

Electron optical techniques for microstructural and compositional analysis of thin films 418
D. R. McKenzie, D. C. Green, P. D. Swift, D. J. H. Cockayne (Sydney, New South Wales, Australia), P. J. Martin, R. P. Netterfield and W. G. Sainty (Lindfield, New South Wales, Australia)

The fine-scale microstructure of thin hard TiN and TiC coatings on steels . . 431
J. C. Knight and T. F. Page (Newcastle upon Tyne, U.K.)

Analytical transmission electron microscopy characterization of plasma spray synthesized TiB_2–Fe coatings 442
G. L'Espérance, G. Bottom (Montreal, Que., Canada) and S. Dallaire (Boucherville, Que., Canada)

Low temperature diffusion effects on microstructural changes in thick gold films on silicon 453
N. Popović, T. Nenadović, Ž. Bogdanov, M. Milić and R. Petrović (Belgrade, Yugoslavia)

A contribution to the study of Poission's ratios and elastic constants on TiN, ZrN and HfN. 463
A. J. Perry (Troy, MI, U.S.A.)

Microelectric devices

Digital applications of superconducting niobium films. 472
S. Kotani, A. Inoue, T. Imamura and S. Hasuo (Atsugi, Japan)

Crystallinity of emitting layer and electroluminescence characteristics in multicolour ZnS thin film electroluminescent device with a thick dielectric ceramic insulating layer 481
S. Takata, T. Minami and T. Miyata (Ishikawa, Japan)

Effects of a phosphosilicate glass layer on the electro-optical performance of thin film electroluminescent structures 489
P. J. Pokela (Espoo, Finland)

Sputtered tungsten for deep submicron complementary metal–oxide–semiconductor technology 501
L. Dori, A. Megdanis, S. B. Brodsky, M. Arienzo and S. A. Cohen (Yorktown Heights, NY, U.S.A.)

Ohmic contacts to III–V compound semiconductors 511
A. Piotrowska and E. Kaminska (Warsaw, Poland)

Schottky barrier at the indium tin oxide–n-GaAs interface: effect of surface arsenic deficiency 528
N. Balasubramanian and A. Subrahmanyam (Madras, India)

Characterization and properties of mixed films

Characterization of α-Al_2O_3, κ-Al_2O_3, α–κ multioxide coatings on cemented carbides 536
S. Vuorinen (Fagersta, Sweden) and J. Skogsmo (Göteborg, Sweden)

Interrelationship between processing, coating properties and functional properties of steered arc physically vapour deposited (Ti,Al)N and (Ti,Nb)N coatings 547
J. R. Roos, J. P. Celis, E. Vancoille (Leuven, Belgium), H. Veltrop, S. Boelens, F. Jungblut (Venlo, The Netherlands), J. Ebberink and H. Homberg (Albstadt, F.R.G.)

Structure and properties of magnetron-sputtered Ti–V–N coatings 557
O. Knotek, A. Barimani, B. Bosserhoff and F. Löffler (Aachen, F.R.G.)
